(ASX:AQR)

Dear Madam,

Mineralogy Studies commenced on selected composite drill hole samples from Whitewash and Gordons

Seven samples representing down hole composites from a selection of the mineralised drill holes at Whitewash and Gordons have been submitted to ALS Mineralogy for mineralogical examination using a Mineral Liberation analyser.

The objective of the analysis is to gain a general characterisation of these samples to determine the mineral abundance, elemental deportment, grain size and mineral association data.

This data will then be evaluated to assist in planned metallurgical test work and will add knowledge to the geological interpretation of the projects.

Yours sincerely

John L. Goody
Executive Director

The information in this report that relates to exploration results is based on information compiled by John Leslie Goody, Executive Director of Exploration, Aussie Q Resources Limited and supervised by Dr. Richard Haren who is a Member of The Australasian Institute of Mining and Metallurgy and who has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity undertaken to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr Richard Haren is a self employed consultant who works for AQR and has consented to the inclusion in this report of the matters based on his information in the form and context in which it appears.
